

Inspro AI governance

Implementation plan and annotated UI/UX designs

Proposed design handoff | 28 September 2026 | Synthetic examples

First delivery: explain adverse claim decisions, disclose AI before autofill, and retain the exact AI review used by the assessor. Establish named owners and the initial governance records alongside this work.

M0 Accountability

Approved scope, policy, owners, risks and supplier evidence requests.

M1 Claim safeguards

Decision reasons, member disclosure and review provenance.

M2 Oversight and validation

Firm/platform records, independent evaluation and approved releases.

M3 Ongoing oversight

Reconsideration requests, outcome monitoring and corrective actions.

M4 Audit readiness

Internal audit, management review and resolution of findings.

Read the companion implementation plan and UX specification for exact requirements. These designs do not represent certification, completed features or production changes.

Claim review

Purpose

Risks

Evidence

History

Checks claim documents and highlights concerns.
A claims assessor makes the decision.

Owner Claims lead

Deployment  ActiveEvidence status  Independent validation needed

Review due 15 Oct 2026

Next action

Validate the review dataset

Assigned to AI lead

 Open action

Scope stays visible

Existing broker navigation and firm context remain in view.

Operational status is separate from evidence

Shows deployment (Active) independently from evidence status (e.g. Action required).

Work opens beside the register

Selecting an AI use reveals full details and next steps in a side panel.

Claim review release

⚠ Blocked

Candidate release · Not active

⚠ Independent validation is missing. This release cannot be approved.

Validation checks

Check	Result	Evidence
Provider connection	✓ Passed	Structured-output probe
Held-out evaluation	⚠ Not measured	Attach evaluation results
Claims reviewer sign-off	– Missing	Assign an independent reviewer
Configuration match	✓ Current	Manifest recorded

Release details

Service:	Claim review
Model:	Candidate model
Prompt:	claim-review v3
Dataset:	Not linked
Threshold profile:	Not linked

Approval

Prepared by: AI lead
Approver: Unassigned

✓ Approve release

Complete validation and independent review first.

+ Add evaluation evidence

Current deployment

i Existing release remains active.

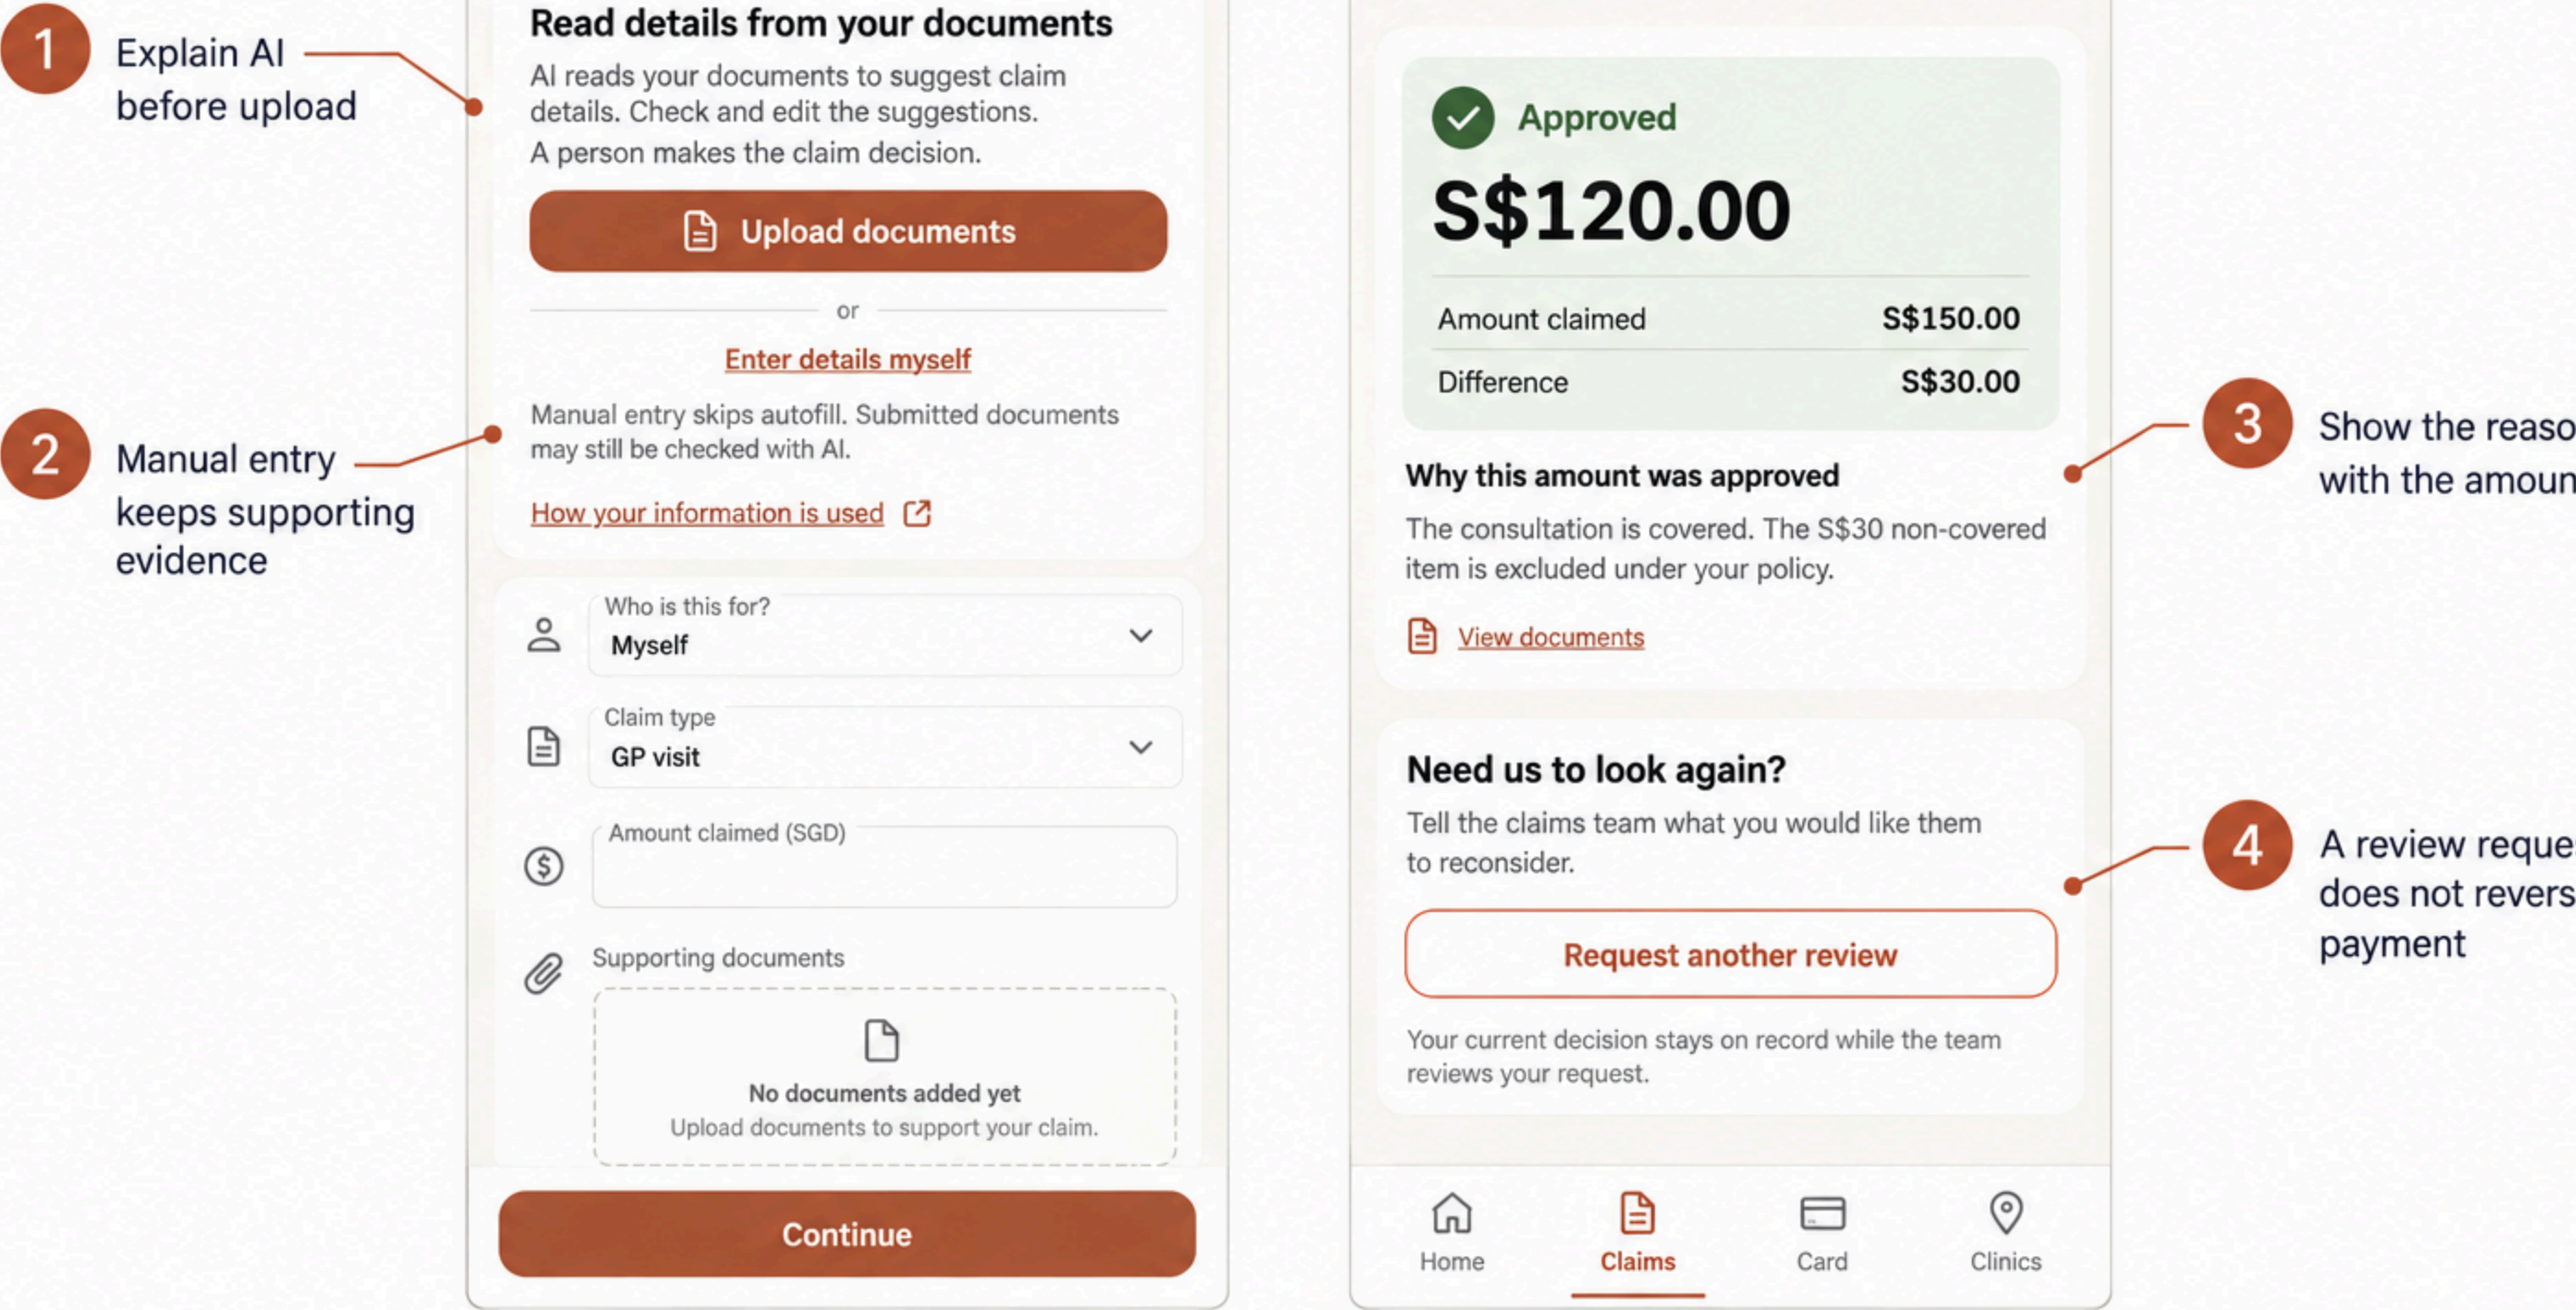

[View active release](#) →

1 Connection is not accuracy validation
A successful provider connection only confirms integration, not model performance. Additional evaluation is required.

2 Missing evidence blocks approval
Independent evaluation results and a reviewer sign-off are required before this release can be approved.

3 A blocked candidate leaves the active release unchanged
While this candidate is blocked, the current deployment remains active.

Member claim journey

Companion screen: evidence and policy

M2 | Firm administrator | Same register and detail pattern as the use inventory

Evidence	Version	Review state	Owner
AI policy	Draft 1	Action required	Firm admin
Assessor training	Not recorded	Action required	Claims lead
Data processing	v1	Review due	Privacy owner

Selected: AI policy

Version

Draft 1

Reviewer

Unassigned

[Assign reviewer]

Next step

Assign a reviewer before requesting approval.

[Save draft]

[Request approval - unavailable until complete]

- 1 Approval records a person, date and exact document version.
- 2 Editing an approved document creates a draft; prior evidence remains available.
- 3 Staff competence records and restricted attachments have narrower access.
- 4 Reviewed evidence never becomes an automatic ISO compliance badge.

Companion screen: data and suppliers

M2 | Platform operator | Firm-specific evidence stays in its own firm scope

Supplier: Google Vertex AI		Review: Action required
Applies to	Claim intake, claim review, configured extraction	
Processing	Configured Singapore endpoint [View configuration]	
Data	Claim documents; health information; identifiers	
Evidence		State
Processing agreement		Not linked
Retention and training-use terms		Needs verification
Inspro retention schedule		Awaiting approval
Deletion / backup procedure		Not linked
Next action	Verify provider terms Owner: Privacy owner	
[Add evidence]	[Create action]	

- 1 A configured endpoint is separate from a verified supplier commitment.
- 2 Unknown retention or training terms remain unknown, with an owner and action.
- 3 Credentials remain on the authorized AI Provider settings surface.
- 4 Evidence exports identify scope and omit raw medical documents by default.
